Transformations to Sustainability

other non-disciplinary specialism around locally specific sustainability challenges. The book explores the notion of 'transformative pathways to sustainability' through experiences in years, and discuss future possibilities, plans and initiatives.

How can we deliver a just transition for biodiversity protection?

The November Forum will be a capacity building event on the topic of transdisciplinary knowledge integration. On this occasion, the Pathways Café, designed as a regular opportunity for Pathways members to meet and exchange on reflections on sustainability science. It was a fantastic start and we are hoping to see many of you at our next Pathways Forum!

Latin and North America, Asia, Europe, and Oceania. It was a truly humbling experience to encounter on inter/transdisciplinary projects during the discussion part of the session.

The climate benefits, co-benefits, and trade-offs of green infrastructure: A review

Sub-Saharan Africa
